As directed by the Committee, Board staff sent a letter to RUSM outlining the concerns, specifically as regards whether or not the education of the RUSM graduates is substantially equivalent to that of a Texas medical school graduate. Ross has submitted a response to the letter requesting to appear before the Licensure Committee. The Committee directed staff to annotate the RUSM entry on the substantial equivalence list to advise applicants that RUSM status on the list is under review due to issues with RUSM graduates not meeting eligibility requirements due to their clinical rotations. The Committee also directed staff to allow RUSM a 30 minute presentation at the next Board meeting and RUSM should submit all written materials at least 30 days prior to the May 1-2, 2014 meeting to allow adequate time for Board member review.

Dear Dr. Flaherty and Dr. Wales:

It has come to the attention of the Texas Medical Board that the number of medical students at Ross University School of Medicine (RUSM) determined ineligible for physician licensure in Texas due to failure to meet eligibility requirements as regards clinical clerkships is disproportionately high. In Fiscal Year 2013, one hundred and twenty two licensure applicants from any school, domestic or foreign, received an initial determination of eligibility for any reason. Of those, twenty were RUSM graduates determined ineligible for failure to meet eligibility requirements as regards clinical clerkships, in that the graduates’ clerkships were not performed in approved settings. The Licensure Committee of the Texas Medical Board discussed this issue at the December 5, 2013 meeting and directed staff to inform RUSM of these concerns and to bring your response to the next Board meeting.

Board rule 163.4(a)(8) (A and B) states:

All applicants for licensure that receive any medical education in the United States must have obtained such education while enrolled as a full-time or visiting student at a medical school that is accredited by an accrediting body officially recognized by the United States Department of Education as the accrediting body for medical education leading to the doctor of medicine degree or the doctor of osteopathy degree in the United States. This subsection does not apply to postgraduate medical education or training. An applicant who is unable to comply with this requirement must demonstrate that the applicant either:

(A) received such medical education in a hospital or teaching institution sponsoring or participating in a program of graduate medical education accredited by the Accreditation Council for Graduate Medical Education, the American Osteopathic Association, or the board in the same subject as the medical or osteopathic medical education if the hospital or teaching institution has an agreement with the applicant's school; or

(B) is specialty board certified by a board approved by the Bureau of Osteopathic Specialists or the American Board of Medical Specialties.
This issue will be placed on the agenda for discussion at the next meeting of the Board’s Licensure Committee, currently scheduled to take place February 6, 2014. One possible outcome is that RUSM’s entry on the TMB web site’s substantial equivalence list will be removed or modified. Please provide any information you wish considered by January 27, 2014 to ensure consideration.

You may submit information to me at my email address –Antonia.knight@tmb.state.tx.us or at the mailing address listed below.

Sincerely yours,

Antonia Knight
