Pain clinic certification may help in 'pill mill' fight

Texas' many legitimate pain management clinics offer an important service to patients. On the other hand, so-called pill mills bill themselves as "pain management clinics" but operate outside controlled substance laws and with little concern for patient safety.

Law enforcement officers find pill mill customers lined up seeking prescriptions for opioids, benzodiazepines, barbiturates or carisoprodol. These medicines play an important role in controlling legitimate pain; for abusers, the drugs produce an addictive high. Taken in excess, they can suppress breathing to a fatal degree.

To help curtail pill mill activity, lawmakers adopted Senate Bill 911 this past legislative session. The law directs the Texas Medical Board to adopt rules that promote patient safety at pain management clinics. Under the new requirements, the physician owner/operator of a pain management clinic must register with the TMB by September 1, 2010. In addition, a pain management clinic may not operate in Texas unless the clinic is owned and operated by a medical director who is a physician who practices in Texas, has an unrestricted medical license and holds a certificate of registration for that pain management clinic.

Certificates, once issued, are not transferable or assignable. Only the primary

physician owner is required to register with the board if there is more than one physician owner of the clinic. Each clinic requires a separate certificate.

The bill also stipulates that:

1) The owner/operator of a pain management clinic, an employee of the clinic, or a person with whom a clinic contracts for services may not:

- have been denied, by any jurisdiction, a license issued by the Drug Enforcement

Doctors must register for electronic death records

Death certificates are posing problems for families of the deceased as well as physicians.

House Bill 1739 mandated electronic death registration for funeral homes and medical certifiers, and took effect September 1, 2007. Doctors had until 2008 to sign on.

The law requires death reports to be filled out and filed electronically with the Texas Department of State Health Services, which maintains the state's vital statistics. The electronic system allows funeral homes to fill out their

portion and a doctor (or justice of the peace) to fill out his or her portion of the required certificate.

To avoid being penalized, all doctors who sign death certificates need to register with Texas' electronic death record system by following this link: www.requestTER.texasvsu.org. Doctors have five days to fill out their portion of a death certificate, and they may delegate most of it to office staff, although the physician must still enter a personal identification number to complete the actual electronic certification. So far roughly 9,700 doctors out of an expected 15,000 have registered.

The Texas Medical Board currently has more than 150 complaints against doctors for not signing death certificates in a timely fashion. Doctors face a \$500 fine from the TMB per violation.

Death certificate delays prevent families from following through with cremation plans. Without a death certificate, survivors can do nothing about a

decendent's will, insurance policy, bank accounts or other paperwork. Funeral homes are subject to inquiries from the Texas Funeral Service Commission for late certificates.

Some doctors have no problem in complying with the new law. "It could not be any simpler. Put in a couple of diagnoses, cause of death, confirm the demographics, and it's over with," says family practitioner Dr. Leonides Cigarros, MD, of Laredo Medical Center in a video for DSHS.

Other physicians have encountered some difficulty with the system for a variety of reasons.

Victor Farinelli, who works for DSHS's Vital Statistics Unit, says the state still accepts paper from doctors who haven't gone digital. "We have to think of the public's interest, too," he said.

When should you use a chaperone?

The following guidelines are from the American Medical Association:

For the sake of ethics and prudence, doctors should establish a policy that patients can request a chaperone, and make them available on a consistent basis for patient exams.

This policy should be communicated to patients, preferably through a conversation initiated by the intake nurse or the physician.

The request by a patient to have a chaperone

should be honored.

An authorized health professional should serve as a chaperone whenever possible. Physicians should establish clear rules about respecting patient privacy and confidentiality to which all chaperones must adhere.

If a chaperone is provided, a separate opportunity for private conversation between the patient and the physician should be arranged. The physician should keep inquiries and history-taking, especially those of a sensitive nature, to a minimum during the course of the chaperoned examination.

‘Clerkships’: Are you at risk for improper supervision or delegation?

By Suzanne Mitchell, J.D.
Assistant General Counsel
Texas Medical Board

Are you a physician involved with graduate medical education and trainee supervision? If so, you may have heard about organizations claiming that they can improve patient safety by matching “pre-qualified” international medical graduates (IMGs) with “willing and qualified attending physicians, hospitals, residency programs, and hospitalist groups to facilitate and supervise pre-residency clinical experience in various primary care specialties.”

If this sounds too good to be true, it may well be. You may be inadvertently subjecting yourself to Board scrutiny regarding how you supervise and delegate to these IMGs.

These organizations describe their “clerkships” as a “win-win” for both IMGs and the “discerning medical residency programs” to which they will be introduced. The IMGs will be given “insured practical hands-on clinical experiences” that will ostensibly give them a “leg up” when it comes time for them to apply for a residency; and the supervising clinicians and healthcare organizations will have an easier time filling primary care residency positions with individuals they know and trust. These organizations also advertise that “all costs” are paid by the participating IMGs, and that “for a limited time, these services are offered to qualified medical residency programs for FREE.”

You may be wondering why any of this should matter to you. Remember, first, that although these positions are often called “clerkships”, these “clerks” are not “students”, since they have already graduated from international medical schools. This means that the regulations in Board Rule 162.1(b) that govern how you supervise medical students do NOT apply in this situation.

Accordingly, the only way that these IMGs can provide the patient care services advertised by these clerkship programs is via delegation from a supervising physician (that would be YOU) pursuant to the Medical Practice Act and Board Rules. A physician may delegate medical acts to another person only when:

- The physician determines that the person is qualified and properly trained; AND
- The physician reasonably believes that sound medical judgment would support the delegation; AND
- The delegated act can be properly and safely performed by the person to whom it is delegated; AND
- the person to whom the act is delegated does not represent to the public that he is authorized to practice medicine; AND
- the person acts under the physician’s supervision.

Keep in mind as well that Board rules pertaining to delegated prescriptive authority would not authorize you to delegate to an IMG the ability to carry out or sign a prescription drug order. You may only delegate prescriptive authority at certain sites, and then only to a physician assistant (PA) or an advanced practice nurse acting under adequate physician supervision.

So, to avoid possible Board discipline for improper supervision or delegation, you would have to make sure you followed these rules, and be sure (regardless of what the organization tells you about the IMGs’ backgrounds and competence) that you have made an independent assessment about their ability to handle delegated medical acts. After all, you remain ultimately responsible for any actions taken by those to whom you delegate.

Please also note that if you supervise IMGs from these programs, you may be subject to Board discipline for “aiding and abetting” the IMG’s unlicensed practice of medicine.

The Texas Medical Board has the authority to, and frequently does, investigate individuals who are believed to be practicing medicine without a license. Practicing medicine is a third degree felony and each day a violation occurs constitutes a separate offense. A person who is finally convicted of practicing medicine without a license in Texas may ultimately be ineligible for Texas medical licensure.

General delegation guidelines are included in Section 157.001 of the Medical Practice Act. Additional information can be found in:

Workplace clinics considered 'alternate practice sites' for docs

Workplace medical clinics are on the increase. A 2008 study by the National Business Group on Health and Watson Wyatt reported that more than 23% of self-insured companies have on-site health programs for their employees. Firms that have already adopted this model include Toyota, Pepsi, and Pitney Bowes.

Often such clinics are staffed only by a nurse practitioner or physician assistant. A question arises regarding doctors who oversee and delegate prescriptive authority, as well as general duties, to the mid-level practitioners. Specifically, are doctors complying with the Medical Practice Act and Board rules?

Workplace clinics – as well as clinics based at grocery stores or other retailers – are generally considered “alternate practice sites” for physicians. Under Texas Medical Board rules, an alternate practice site may be located up to 75 miles from either the delegating physician's residence or primary practice site. The delegating physician must be on-site 10% of the hours of operation of the site each month and must be available while on-site to care for patients usually seen by the physician assistant or nurse practitioner. The PA or APN must be onsite too at this time so the physician

can evaluate how the midlevel is doing.

Doctors may seek waivers from the Board for the:

- 1) mileage limitation between a supervising physician's primary practice site and alternate practice site: and
- 2) on-site supervision requirements, though the physician must be available onsite at regular intervals.
- 3) And, when on-site, the physician must be available to treat patients.

Before granting a waiver, the Board must determine that the types of health care services provided by the PAs and APNs are limited in nature and duration, within the scope of delegated authority, and that patient health care will not be adversely affected.

Before you accept directorship for such an on-site clinic, please check the Board's rules to ensure that your actions will not place you in violation of the Medical Practice Act and subject to disciplinary sanctions. Since the Fall 2009 issue of the Medical Board Bulletin, the Board has taken disciplinary action on 265 physicians, five physician assistants, two acupuncturists and two surgical assistants. The Board issued three cease and desist orders for unlicensed practice. The following is a summary of those actions.

TEMPORARY RESTRICTION/SUSPENSION

Cavender, Lundy Eldridge, M.D., Lic. No. H7711, Burleson TX

On June 2, 2010, a Disciplinary Panel of the Board, including at least one physician, entered an Order of Temporary Suspension (With Notice of Hearing) against the medical license of Lundy Eldridge Cavender, Jr., M.D., after concluding that Dr. Cavender's continuation in the practice of medicine presents a continuing threat to the public welfare. The temporary suspension remains in effect pending further Board action. This immediate temporary suspension with notice was initiated after the Board found

evidence that included the following: unprofessional or dishonorable conduct by exposing himself and masturbating in view of female employees on numerous occasions in public areas of his office clinic; and being unable to practice medicine with reasonable skill and safety to patients as the result of a mental or physical condition, as indicated by two suicide attempts and a self-admission into a psychiatric treatment program in 2009 to seek treatment for unresolved psychiatric conditions.

O'Neal, Don Martin, M.D., Lic. No. E2769, Sulphur Springs TX

On May 24, 2010, a Disciplinary Panel of the Board entered an Order of Temporary Suspension (Without Notice of Hearing) against the medical license of Don Martin O'Neal, M.D., after concluding that Dr. O'Neal's continuation in the practice of medicine presents a continuing threat to the public welfare. The temporary suspension remains in effect pending further Board action. This immediate temporary

suspension without notice was initiated after the Board found evidence that included the following: In November 2008, the Drug Enforcement Administration (DEA) investigated Dr. O'Neal for prescribing various narcotics in significant quantities to numerous patients; in August 2009, Dr. O'Neal surrendered his DEA authorization to prescribe controlled substances to avoid further DEA investigation and potential criminal charges; in January 2010, a physician colleague of Dr. O'Neal discovered that he had been using the colleague's signature stamp to authorize his continued prescribing of controlled substances to numerous patients; and in April 2010, based on Dr. O'Neal's continuation of narcotics prescribing without a valid DEA authorization of his own, and by using the DEA authorization of another physician, he was charged with a total of 55 felony counts related to the allegations of fraudulent and/or unauthorized prescribing of controlled substances.

Patrick, Joseph J., M.D., Lic. No. G7864, Houston TX

On June 2, 2010, a Disciplinary Panel of the Board, including at least one physician, entered an Order of Temporary Restriction (With Notice of Hearing) against the medical license of Joseph J. Patrick, M.D., after concluding that Dr. Patrick's continuation in the practice of medicine would constitute a continuing threat to the public welfare. The temporary restriction remains in effect pending further Board action. This immediate temporary restriction with notice was initiated after the Board found evidence that Dr. Patrick: non-therapeutically prescribed controlled substances, and prescribed in a manner inconsistent with the public health and welfare, as evidenced by his having written over 21,000 prescriptions for controlled substances in a 19-month period, including 900 controlled substance prescriptions through an emergency medical ambulance service; failed to adequately supervise persons to whom he delegated prescriptive authority; and pre-signed prescriptions that were issued while he was out of the country. In addition, the Board also found that Dr. Patrick did not timely respond to the Board's requests to provide information and medical records. Dr. Patrick admitted he had not acted diligently in his role as Medical Director at the several clinics where the prescriptions were issued. The 2010 Order temporarily restricts Dr. Patrick's practice by prohibiting: any practice other than as an emergency room (ER) physician in a hospital ER; prescription of any Schedule II drugs for any purpose; prescription of controlled substances or other pain medications other than for acute pain and in an amount in excess of

what is needed by a patient for 72 hours; authorization of refills for any controlled substances or other pain medications, and prescription of controlled substances or other pain medications for any patient he has previously seen in the ER and prescribed such drugs.

Shiller, Alan Dale, M.D., Lic. No. H8398, Palestine TX

On March 17, 2010, a disciplinary panel of the Texas Medical Board entered an order of temporary suspension without notice of hearing against Alan Dale Shiller, M.D., effective immediately. The length of a temporary suspension is indefinite and it remains in effect until the Board takes further action. The panel determined that Dr. Shiller's continuation in practice would constitute a continuing threat to the public welfare. The action was based on the following findings: On December 4, 2009, Dr. Shiller, while on-call for ophthalmological emergencies at Palestine Regional Medical Center, was observed driving his vehicle into a utility pole. He left the scene and drove off the highway, through several mailboxes and into a tree. He was taken to the emergency room where staff found an empty 100 mg vial of demerol in his pants pocket. A toxicology screen performed at the hospital was positive for barbiturates, benzodiazepines, opiates and PCP.

QUALITY OF CARE VIOLATIONS

Angel, Robert Tate, M.D., Lic. No. C8881, Waco TX

On February 5, 2010, the Board and Dr. Angel entered into a mediated agreed order requiring Dr. Angel to pass, within one year of the order entry date, the SPEX exam given by the Federation of State Medical Boards. Dr. Angel has three attempts to pass the SPEX within this time period. Until Dr. Angel passes the SPEX within the designated time period, he must abstain from the practice of medicine involving direct patient contact and limit his medical practice to administrative, non-clinical medicine. Dr. Angel must also complete eight hours of CME in medical record-keeping within one year of the order entry date. The Board's action was based on Dr. Angel's failure to meet the standard of care, failure to maintain adequate medical records and his delivery of non-therapeutic medical care to three patients, one of whom died.

Atun, Victor J., M.D., Lic. No. K6986, Sugar Land TX

On June 4, 2010, the Board and Victor J. Atun, M.D., entered into an Agreed Order requiring Dr. Atun to complete within one year eight hours of CME in hand surgery and pay an administrative penalty of \$1,000

continued next page

within 60 days. The Board's basis for action was Dr. Atun's failure to practice medicine in an acceptable, professional manner and safeguard against potential complications when he did not recognize a patient's potential for self-injury and decided not to cast-immobilize the hand of a patient with a thumb injury, resulting in the need for a third surgery.

Bacon, Robert J., Jr., M.D., Lic. No. F0861, Houston TX

On February 5, 2010, the Board and Dr. Bacon entered into an agreed order requiring Dr. Bacon to pay an administrative penalty of \$2,500 within 90 days. The Board's action was based on Dr. Bacon's failure to meet the standard of care and maintain adequate medical records. The Board found that Dr. Bacon did not prescribe methadone to a transferred patient with opioid dependence in a therapeutic manner.

Bessonett, Paula Alinda, M.D., Lic. No. H4166, Grand Saline TX

On May 3, 2010, the Board and Paula Alinda Bessonett, M.D., entered into an Agreed Order requiring Dr. Bessonett to complete an Advanced Cardiac Life Support Course and obtain ACLS certification within one year; complete within one year 16 hours of CME, including eight hours in reading EKG results and eight hours in treatment of acute coronary syndrome. On June 4, 2010, the Board entered a Default Order against Jennifer Joanne Few, M.D., which revoked her Physician-In-Training (PIT) No. BP10023537, that was effective until December 1, 2008. This follows an August 28, 2009, filing by the Board of a Complaint with the State Office of Administrative Hearings (SOAH) in case no. 503-09-6284, which alleged that Dr. Few provided false information to the Board, and failed to comply with Board directives. Further, it alleged that Dr. Few's medical judgment and ability to practice under the PIT permit were impaired. Previously, she reported she suffered from Hodgkin's lymphoma which was a false statement. Later, however, Dr. Few was diagnosed with major depressive disorder and Munchausen's Syndrome. After making one response to the Board denying she had any condition-related practice impairment, Dr. Few failed to respond to any subsequent Board requests for information. The Board then filed the SOAH Complaint to seek revocation of her still-active PIT. After filing the SOAH Complaint, all notices were perfected and the Board issued a Determination of Default, and all other required deadlines passed without any response from Dr. Few and/or her attorney of record. As a result, all facts alleged in the Complaint were therefore deemed admitted, and Dr. Few's PIT was revoked by Default Order.

AUTOMATIC REVOCATION AND SUSPENSION ORDERS

King, Clarence Gordon, Jr., M.D., Lic. No. E1883, San Antonio TX

On January 7, 2010, the Board entered an automatic revocation order for an indefinite period against Dr. King for a violation of a seven-year 2003 agreed order with terms and conditions related to substance abuse. The 2003 order required, among other things, that Dr. King abstain from the use of prohibited substances

and undergo alcohol and drug screens. The 2003 order contained a provision allowing for an automatic revocation of Dr. King's license for a positive alcohol or drug screen. Due to low-level positive screens in 2004 and 2006, the Board twice-modified Dr. King's 2003 order by extending it each time by three years, resulting in a new termination date in 2015, but the Board did not exercise the auto-revocation provision due to mitigating circumstances. In May 2009, Dr. King again tested positive for a metabolite of ethanol consumption, and the Board exercised its authority under the 2003 order, as modified, to automatically revoke Dr. King's license.

On January 15, 2010, the Board entered an automatic revocation order for an indefinite period against Dr. McNeill for violations of a 2004 10-year agreed order. The 2004 order required, among other terms and provisions, that Dr. McNeill submit to random alcohol and drug screenings to ensure abstinence from alcohol and/or other prohibited substances. The 2004 order also provided that any violation of that provision by having a positive drug screen could result in the automatic revocation of Dr. McNeill's license. In addition to having other documented compliance violations, the immediate revocation of Dr. McNeill's license was based on his violation of the 2004 order by testing positive for alcohol on a drug and alcohol screen performed in March 2009.

Waller, Stephen Frank, M.D., Lic. No. F8724, Conroe TX

On May 12, 2010, the Board entered an Automatic Suspension Order for an indefinite period against Stephen Frank Waller, M.D., and it will remain in effect until such time as Dr. Waller provides evidence that shows he is in compliance with the terms and conditions of his February 2009 Agreed Order. The 2009 Order required Dr. Waller to obtain 20 hours of CME, as well as successfully pass the Medical Jurisprudence Exam (JP Exam), all to be completed within one year

continued on next page

of the 2009 Order's effective date. The 2009 Order also contained a provision that failure to complete the JP Exam could subject Dr. Waller to an automatic suspension of his medical practice license. Dr. Waller made no attempt to comply with either requirement of the 2009 Order, and at a hearing on the non-compliance, he offered no reasonable excuses for consideration. Accordingly, acting under the terms in 2009 Order, the Board automatically suspended Dr. Waller's license.

The Board adopted the findings of an administrative law judge of the State Office of Administrative Hearings regarding Dr. Rivera's failure to properly delegate and supervise a pharmacist who provided drug therapy to a patient. Dr. Rivera filed a motion for rehearing within 20 days of the order. If the Board denies the motion, the order is final. The Board's action was based on Dr. Armstrong's violation of a 2006 Order suspending his license, aiding and abetting the practice of medicine by a person not licensed to practice medicine and dishonorable conduct likely to defraud or injure the public. The Board found that Dr. Armstrong signed federal forms so two patients could receive Medicare, even though he was excluded from such activities due to his suspended license.

In addition, Dr. Murray is allowed to be part of a medical team providing Propofol or other heavy or general anesthetic as long as Dr. Murray does not personally administer or prescribe them. The action is based on the board's finding that Dr. Murray is subject to criminal charges in California related to possible non-therapeutic prescribing that resulted in the death of a patient. The Board's action was based on evidence showing that Dr. Bartschi is incarcerated at a United States Penitentiary in Tuscon, Arizona, following his conviction in October 2008 on several felony counts that included: Evasion of Assessment; Evasion of Payment; Submission of Fictitious Obligations, and Mail Fraud. The Board brought this action as the result of Dr. Mallou being convicted by a Dallas County jury in cause no. F-07-71821 for the second-degree felony offense of sexual assault, and his placement on 10 years probation. On the basis of the Board's showing that this initial felony conviction was a fact of record, the SOAH court granted the board's motion for summary disposition and issued the PFD, allowing for this final order. Dr. Mallou may file a motion for rehearing within 20 days of the order. If a motion for rehearing is filed and the board denies the motion the order is final.
