**Agenda Item 11** Discussion, recommendation, and possible action regarding evaluation of international medical schools Dr. Patrick discussed the possibility of creating an agency program through legislation and rulemaking to determine if certain international medical schools' graduates' education could be considered to be substantially equivalent to that of a Texas medical school. The review of these medical schools would be through a combination of document and on-site review of each school. Dr. Patrick also discussed the possibility of creating an administrative procedure for such determinations in the interim. Staff will research and gather more information for the Committee to review.

**Agenda Item 12** Discussion and recommendation regarding additional eligibility criteria for applicants who are not graduates of either an acceptable approved medical school or an acceptable unapproved medical school - Ms. Garanfio asked the Committee for their thoughts about possible remedies for issues concerning the medical education of applicants from unacceptable unapproved medical schools. The Committee discussed the possibility specialty board certification or additional training in a specific field as remedies for certain medical education issues. The Committee discussed the California Board's past policy of requiring applicants to enroll in an acceptable approved medical school to repeat rotations. The Committee expressed the concern that if remedies are developed, they must address the need of the board to verify that applicants from unacceptable unapproved medical schools are competent to practice medicine safely.
