Message From the TMB President: 2023 Legislative Session

Zaafran

With the conclusion of the 88th Texas Legislature’s regular session, several bills passed impacting our licensee populations and the Texas Medical Board.

The Board remains dedicated to ensuring public safety and maintaining high standards of medical practice in Texas. During the recent session, the

Legislature approved new measures in furtherance of these goals. We are thankful for the Legislature’s commitments and the additional appropriated resources to support the agency and its staff as we carry out our mission.

A key piece of legislation passed and signed into law by Governor Abbott was [House Bill 1998](#), which has several provisions affecting licensing, enforcement as well as the important work of the [Texas Physician Health Program \(TXPHP\)](#).

The TXPHP was created by the Legislature in 2009 as an independent and confidential program for licensees of the Board in order to protect the health of Texans and to promote medical excellence. TXPHP provides early intervention, assessment, treatment referrals and post-treatment monitoring for health professionals affected by potentially impairing conditions, including substance use disorders, physical illnesses, and psychiatric conditions.

Historically, TXPHP has relied on self-funding to maintain its operations, which primarily consisted of the program’s participant fees and additional funding from the Texas Medical Board. This method of financing the program has not been ideal in light of the addition of health occupations whose licensees may find the participant fees to be a barrier to entry into the program.

Through an increase in licensing fees, TXPHP will be financed to an appropriate level and will allow anyone licensed with the TMB, or any of its other licensing boards, to be able to afford enrollment with the TXPHP.

This is a great improvement to the program that will help those seeking treatment get the important care they need, while also ensuring they remain safe to practice in their respective profession.

Additional provisions of the bill will allow the TMB to participate in the National Practitioner Data Bank’s [Continuous Query \(CQ\)](#) program.

The CQ program keeps health regulatory entities informed about enrolled practitioners. TMB will receive email notifications within 24 hours of a report received by the NPDB, rather than months utilizing standard reporting.

The TMB is hard at work implementing the program, training staff and has begun enrolling new and renewing licensees in CQ. This added reporting tool will be of great benefit to the agency’s licensure and enforcement programs going forward.

President's Message, Cont.

NOTE ON EMERGING MEDICAL BUSINESS MODELS

I have heard concerns and questions from colleagues in the medical community about the prolific emergence of new, different forms of medical service business models. Advancements in safe, novel, medically appropriate approaches to treating Texas patients is welcome. However, I would like to take this opportunity to issue some friendly reminders about existing Texas regulations to anyone engaging in the provision of these new models or any form of medical intervention in this state. Examples of these models include facilities offering injections such as Botox, or intravenous (IV) vitamin therapy, hydration therapy, Ketamine, Toradol, Zofran, IV fluids such as saline, and other similar services.

First, it is important to understand that these models are the practice of medicine. Despite some of the more innocuous language frequently associated with them such as "Immunity Boosting", "Hangover Fix", or "Beautify", at its core, the use of IV therapy or giving an injection is an invasive medical procedure or treatment.

Because these are medical procedures or treatments, they must be administered by a Texas licensed physician or properly delegated to qualified non-physicians to provide such services while under the physician's delegation and supervision. Physicians are encouraged to review existing TMB regulation, [Chapter 193 – Standing Delegation Orders](#), for full guidance on the Board's rules related to delegation and supervision requirements and responsibilities.

Other federal and state statutes and rules may also apply, including the Federal Drug Administration and Texas requirements for prescribing and using IV therapies. The specific laws depend on the setting, procedure, and treatment. Additional considerations include the establishment of a physician-patient relationship, an adequate medical history, medical records, obtaining proper consent for treatment, etc. Medical treatments must be provided pursuant to medical standards and not based on the patient choosing a treatment from a menu without an appropriate assessment of the patient by a qualified individual. It is recommended to seek legal guidance before engaging in the provision of these new models or any form of medical intervention in this state.

Keep in mind that despite how commonplace these practices have become, there are associated risks and potential complications that may arise. Common concerns include fluid overload, causing electrolyte imbalance, infection from IV placement, and contaminated product being used or prepared under unsanitary conditions. Additionally, some of these therapies involve providing Ketamine and other controlled substances. These controlled substances carry inherent risks with their usage and require a physician's medical diagnosis of condition and prescription before being administered or provided, as well as only being given in a proper and appropriate setting. With the administration of medications such as Ketamine, or other anesthetic agents, rules around Office Based Anesthesia may apply. Any time a medical procedure or treatment is provided it must be by a properly trained individual, whether a physician or other qualified individual.

Remember, physicians are ultimately responsible for the quality of the care and treatment provided to their patients by their delegates.

REMINDER ON INFORMED CONSENT

I have also heard from many of you asking about the revised Disclosure and Consent Forms issued by the [Texas Medical Disclosure Panel](#) effective September 1, 2023 related to [Anesthesia and/or Perioperative Pain Management](#) and [Radiation Therapy](#), respectively.

Based on some of the questions I've received, I feel as though it is important to revisit the topic of informed consent and ensure that TMB licensees are clear on what the Texas Medical Board expects from licensees in terms of obtaining proper informed consent.

Informed consent is a process through which the patient (or their legal representative) is explained the treatment being provided, can ask questions, and is afforded an opportunity to decline the treatment. An informed consent is required for every episode of anesthetic care provided to the patient. Informed consent includes communication between physician and patient (or legal guardian) of associated risks of the proposed treatment.

(Continued on page 3)

President's Message, Cont.

This information can be given in a written or video format preceding an anesthetic, or by a delegate of the physician, so long as the consenting individual has the opportunity to ask questions to the physician if requested. Depending upon the individual patient's circumstances and the treatment provided, consent can be given either verbally or in writing. In either case, when consent is obtained from the patient or their legal guardian it must also be documented in the medical record. Failure to document this consent in the medical record is a violation of the Medical Practice Act. The only time physicians' signatures are mandatory on the consent is in an emergency setting if the patient is incapacitated and there is no legal guardian immediately availa-

ble. In that instance, there needs to be the signature of two physicians noting the emergent need to proceed.

Respectfully,

Dr. Sherif Zaafran, M.D., FASA

Texas Medical Board President

Physician Assistant Board Recognizes PA Week

Crosby

The Texas Physician Assistant Board's Presiding Officer, Karrie Lynn Crosby, PA-C, MPAS, issued the following statement acknowledging "PA Week," which celebrates the physician assistant profession every year from October 6-12:

"Along with our entire board, I want to extend a heartfelt appreciation to all physician assistants across our great state as we celebrate "PA Week." This week is a special occasion to recognize and acknowledge the invaluable contributions of physician assistants in our healthcare community.

"Physician assistants play an indispensable role in ensuring accessible, high-quality healthcare services for our fellow Texans, with many serving in our rural and underserved communities.

"Their commitment to patient care, medical expertise, and collaborative spirit make them an integral part of the healthcare team across all specialties and settings, including hospitals, clinics and private practices.

"During PA Week, and throughout the year, we are grateful for their hard work and dedication. Thank you, Texas PAs, for all that you do!"

COMING SOON: New Criminal History Background Check Requirement

Criminal history background checks through the Department of Public Safety (DPS) and the Federal Bureau of Investigation (FBI) will soon be required prior to registration for current physician licensees.

The fingerprinting requirement for physicians is a result of legislation passed during the 88th legisla-

tive session in 2023. Fingerprint results will not be REQUIRED until physician registration/renewal but will need to be done prior to completion of the online registration/renewal.

Licensees will receive advance notice from the TMB of when they should begin the process.

ALERT Reminder: Scams Targeting Licensees

We remind **ALL** licensees to be on the alert for scammers impersonating the Texas Medical Board, other licensing boards, and other state and federal agencies over the phone or through fake letters sent via FAX, email, or mail.

In some instances, scammers may claim to be employees with the TMB, DEA, FBI or other law enforcement entity and may even attempt to spoof phone numbers making it appear as though a call is originating from a government agency, or send documents on official-looking letterhead demanding money or other action ([click here for an example of a fake letter](#)).

In one recent scam, a medical clinic received a phone call spoofing a TMB phone number in which the caller identified himself as "Terrance," a TMB investigator who needed to relay "important information" to a physician about their license. The caller repeatedly indicated that they needed to verify the physician's information, gave their license number, and told the physician they needed to inform them of a "legal complaint." The caller then transferred the call to another individual who identified

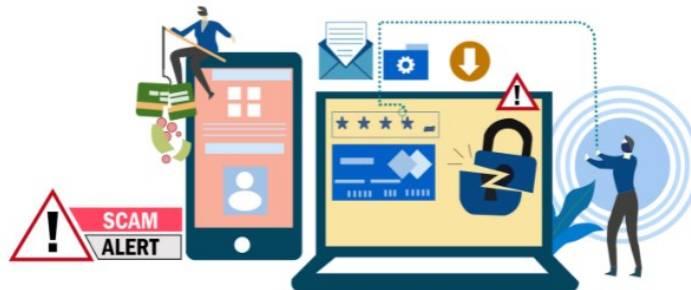

himself as the "chief investigator officer" to provide further information. This other individual stated they were from the "Medicine Board of Texas," then informed the physician they received a legal complaint of "illegal drug trafficking" from the FDA and the "FBI Department," and provided a fake badge number and case number to the physician. The caller said the line was being recorded

and requested the physician's personal cell phone number to continue the conversation.

Please know the TMB staff would never call and discourage individuals from contacting lawyers, make requests for sensitive information over the

phone or send demand letters for money to reinstate licenses or threaten the arrest of licensees. The TMB does not suspend licenses at the direction of the DEA, FBI or other federal entity. Additionally, the TMB has no authority to issue, cancel, or influence arrest warrants, as some scams have indicated.

For more information on scams and how to report them to law enforcement authorities, visit: <https://www.tmb.state.tx.us/page/scam-alerts>

TMB Offices Have Moved to New Location

Texas Medical Board offices have relocated to the George H.W. Bush state office building on 1801 Congress Avenue, part of the Texas Capitol Complex expansion project to centralize state agencies.

The TMB's new physical address is: **1801 Congress Avenue, Suite 9.200**
Austin, TX 78701

Please note agency phone numbers, FAX numbers, and P.O. Box numbers did not change.

NOTICE REGARDING PUBLIC ACCESS TO BUILDING:

While TMB offices are open to the public, the current Texas Facilities Commission rules for accessing agency suites in the George H.W. Bush Building are very restrictive. As such, for now, we would encourage TMB customers to reach out to us via email, phone, or mail as opposed to visiting in-person. This will enable the agency to provide the best possible service and reduce inconvenience for customers.

The Board panel found that Dr. Gallagher failed to properly supervise an unlicensed individual performing intravenous (IV) treatments, including administering prescription pharmaceutical solutions, resulting in complications that staff were not trained or prepared to manage, resulting in a patient's death. A temporary suspension hearing with notice will be held as soon as practicable with 10 days' notice to Dr. Gallagher, unless the hearing is specifically waived by Dr. Gallagher. The temporary suspension remains in place until the Board takes further action.

Haden, Marshall L., M.D., Lic. No. BP10078006, Houston

UNPROFESSIONAL CONDUCT

Alalwan, Ali Abdulrazzaq A., Lic. No. BP10071652, Amarillo

On June 9, 2023, the Board and Ali Abdulrazzaq A. Alalwan, M.D., entered into an Agreed Order publicly reprimanding Dr. Alalwan and requiring him to within one year and three attempts pass the Medical Jurisprudence Exam; within one year complete at least 12 hours of CME, divided as follows: four hours in ethics, four hours in pre-

scribing and four hours in risk management; and within 60 days pay an administrative penalty of \$1,000. The Board found Dr. Alalwan attempted to pay apartment cleaning fees by providing prescription medication without having evaluated the person nor establishing a physician-patient relationship.

Baker, Ronald Fredrick, M.D., Lic. No. L5234, El Paso

On June 9, 2023, the Board and Ronald Fredrick Baker, M.D., entered into an Agreed Order requiring him to within one year complete at least 20 hours of CME, divided as follows: eight hours in risk management and 12 hours in ethics; and within 60 days pay an administrative fee of \$4,000. The Board found Dr. Baker inappropriately prescribed to one patient with whom he did not have a valid physician-patient relationship and prescribed high-cost vitamins and common medications by electronic communications for over 1,100 patients screened and referred by a telemedicine company.

Bishai, Emad Mikhail Tewfik, M.D., Lic. No. N7224, Conroe

On June 9, 2023, the Board and Emad Mikhail Tewfik Bishai, M.D., entered into an Agreed Order suspending Dr. Bishai's medical license; however, the suspension is stayed and he is placed on probation under the following terms: shall not use his Texas license in any jurisdiction to diagnose, treat, or prescribe controlled substances to patients in Texas for chronic or post-surgical, post-procedure, persistent non-chronic pain as defined by Board rules or engage in the practice of pain management in Texas; limit his practice to psychiatry and family medicine; have his practice monitored by another physician for eight consecutive monitoring cycles; and shall not be permitted to supervise or delegate prescriptive authority to a physician assistant or advanced practice nurse or supervise a surgical assistant. The Board found Dr. Bishai entered into a settlement agreement with the U.S. Department of Justice excluding him from participating in any federal health care programs based on allegations that he submitted false claims for the placement of electro-acupuncture devices and for making false statements when applying for a loan from the Paycheck Protection Program. The order does not supersede any prior orders.
