TX Health and Human Services Commission: Medicaid Covering Mosquito Repellent

Texas Medicaid will cover certain mosquito repellent products as a Medicaid benefit for the prevention of Zika virus. Zika can cause severe birth defects in unborn children whose mothers are infected while pregnant. Because there is not a vaccine to prevent the disease or medicine to treat it, it is important for women to use repellent to protect themselves and unborn babies.

Important Updates on Prescribing Controlled Substances (SB 195)

Physicians and Physician Assistants (PAs) who prescribe or will be prescribing controlled substances in the state of Texas need to be aware of recent changes to the laws regarding prescribing and ordering these drugs.

Texas Controlled Substances Registration Numbers for Physicians and PAs:

Under Senate Bill 195, the requirement for controlled substances registration (CSR) with the Texas Department of Public Safety (DPS) was eliminated on September 1, 2016. DPS has stopped accepting applications for the Texas Controlled Substances Registration under Chapter 481.061 of the Health and Safety Code. All applications received by DPS will be returned to the customer.

The DPS CSR registration process will not be replaced by another process. Physicians and PA's will continue to be required to hold registration from the U.S. Drug Enforcement Administration in order to prescribe controlled substances and to register prescriptive delegation for Physician Assistants and Advanced Practice Nurses with the Texas Medical Board.

Physician Assistants with Temporary Licenses pending Medical Board approval will still be required to file a Prescriptive Delegation Form with the Registrations Department of the Medical Board. To request a form, please email Registrations@tmb.state.tx.us. The DEA will verify temporary licenses with assigned delegation for registration of a DEA CSR directly with Board staff.

Prescription Pad Orders:

Effective September 1, 2016, the Texas Prescription Program transferred to the Texas State Board of Pharmacy (TSBP). This includes the oversight and processing of the official prescription pads for Schedule II prescription forms. The Texas Department of Public Safety no longer accepts orders for official prescription pads; however, official prescription forms issued by the Texas Department of Public Safety prior to September 1, 2016 will be considered valid prescription forms. Official prescription pad orders submitted to DPS will be returned to the customers.

Information from the Department of Public Safety on this bill is located at <https://www.txdps.state.tx.us/RSD/ControlledSubstances/index.htm>.

For information regarding the new prescription pad ordering process, visit the TSBP's website: <http://www.pharmacy.texas.gov/rxpad/>.

Prescription Monitoring Program Changes:

The prescription monitoring program known as Prescription Access in Texas (PAT) was also moved to the Texas State Board of Pharmacy (TSBP) effective September 1, 2016, and is now called the Prescription Monitoring Program (PMP).

The new prescription monitoring program is available through the TSBP's website, along with information on how to update registrations, visit: <https://www.pharmacy.texas.gov/PMP/>.

Notice from TX Dept. of Aging and Disability Services Regarding Dementia Care

In 2012, the Centers for Medicare and Medicaid Services (CMS) launched the National Partnership to Improve Dementia Care in Nursing Homes, an initiative to enhance the quality of life for people with dementia in nursing facilities, protect them from substandard care, and promote goal-directed, person-centered care. One key quality measurement it focused on was reducing the inappropriate use of anti-psychotic medication on residents with dementia. Additional information on this initiative can be found on the CMS website.

While this measure has been posted on the CMS Nursing Home Compare website since 2012, CMS only recently added the measure on anti-psychotic medication use to its calculation of a nursing facility's Five Star Quality Rating. CMS also has integrated focused dementia care surveys into the routine survey process.

The goal is to ensure that individuals with dementia have care plans that call for non-pharmacologic methods to manage symptoms of dementia, as well as documentation to substantiate the use of anti-psychotic medication. If an individual has another documented mental health diagnosis, this care plan also should have documentation detailing how long the individual has been diagnosed and how the diagnosis was made if it is a recent occurrence.

Texas Health and Human Services offers additional information on this initiative on our website. To learn more, visit the hhs.texas.gov website and enter "antipsychotic" in the search box at the top of the page.

Transportation Safety and the Effects of Medication and Health Conditions

Note: the following article ran in the Texas Board of Nursing's July '16 newsletter. Nurses have specific rules about informing patients of safety issues when operating vehicles while taking medications.

Nurses have a duty to keep patients safe [Rule 217.11(1)(B)], and that duty includes helping patients understand how their medications and medical conditions may influence their ability to perform various activities in and outside of the health care environment. Research from the National Transportation Safety Board (NTSB) related to pilots demonstrates the importance of discussions between health care providers and their patients about the potential risks that drugs and medical and mental health conditions can create when patients are operating a vehicle in any mode of transportation. It is important for nurses to remember that even over-the-

counter medications, such as diphenhydramine or non-steroidal anti-inflammatory drugs, can cause side effects, such as drowsiness, that can affect thought processes and reaction time. Likewise, various health conditions can have an effect on a patient's ability to safely operate a vehicle. It is important to remember that the effects of medical conditions and medications can affect the patient's personal safety, as well as the safety of those around them, when the patient is operating a vehicle in any mode of transportation, and the patient may be unaware of these effects.

Nurses play a key role in this important public health and safety issue. Nurses at all levels of licensure have a duty to educate their patients about the effects of medica-

(Continued on page 5)

(Continued from page 4)

tions and medical conditions and the importance of exercising caution when operating vehicles of any type [Rule 217.11(1)(F) and (1)(P)]. This helps nurses to promote patient safety for their patients and others who may come in contact with those patients [Rule 217.11(1)(B)]. Nurses must be sure to document their teaching regarding these important aspects of patient care [Rule 217.11(1)(D)]. When appropriate, the nurse may also educate the patient's significant other, family members, or caretakers regarding these concerns. The patient's friends and family members may be in a position to help the patient recognize when s/he may be unsafe operating a vehicle.

Nurses need to be aware that some of their patients may be employed in a position that requires them to operate a vehicle or heavy equipment as one of their job duties. It is important for nurses to work with their patients to recognize that a health care condition or medi-

cation may prevent the patients from meeting employment demands for a period of time. Nurses should be sure patient education includes content related to the impact of a medication or health condition on the patient's employment, recreational activities, and other aspects of the patient's life. This is particularly important for patients who are newly diagnosed with a medical or mental health condition or may be starting a new medication.

Disciplinary Actions

The following disciplinary actions have been taken since the previous bulletin was issued. To read previous bulletins and news releases, visit: <http://www.tmb.state.tx.us/page/news>

TEMPORARY SUSPENSION/RESTRICTION

Ahmed, Faiz, M.D., Lic. No. J4683, Houston

On September 7, 2016, a disciplinary panel of the Texas Medical Board temporarily suspended, without notice, the Texas medical license of Faiz Ahmed, M.D., after determining his continuation in the practice of medicine poses a continuing threat to public welfare. The suspension was effective immediately. The Board panel found that on July 27, 2016, Dr. Ahmed submitted to a neuropsychological evaluation as required by a previous Board action. The neuropsychological evaluation, submitted to the Board on August 23, 2016, states that Dr. Ahmed's neuropsychological testing provides objective evidence of cognitive dysfunction that would compromise Dr. Ahmed's abilities to perform the duties of his job as a physician at this time. A temporary suspension hearing with notice will be held as soon as practicable with 10 days' notice to Dr. Ahmed, unless the hearing is specifically waived by Dr. Ahmed. The temporary suspension remains in place until the Board takes further action.

Beasley, Craig Clark, M.D., Lic. No. K1160, Throckmorton

On August 18, 2016, a disciplinary panel of the Texas Medical Board temporarily restricted, with notice, the Texas medical license of Craig Clark Beasley, M.D., after determining his continuation in the practice of medicine poses a continuing threat to public welfare. The restriction was effective immediately. The restriction prohibits Dr. Beasley from prescribing Schedule II controlled substances for more than a 72-hour period and may not provide any patient with refills of a Schedule II medication under any circumstances. The restriction applies to treating all pain patients, whether for acute or chronic pain. Dr. Beasley shall maintain a drug testing protocol for all patients receiving controlled substances and shall not prescribe a controlled substance to a patient who has tested positive for an illicit drug. The Board panel found based on the evidence presented, Dr. Beasley's care and treatment demonstrates a pattern of non-therapeutic prescribing for his chronic pain patients. Specifically, Dr. Beasley failed to adequately document that he performed physical examinations to assess the cause(s) of patients' chronic pain before he prescribed significant quantities of pain medication, failed to follow-up with physical examinations or other diagnostic testing, failed to institute opioid risk assessments such as drug screening, failed to document a rational and individualized treatment plan and did not refer his chronic pain patients to outside pain management experts. Dr. Beasley also did not adequately address positive drug screening tests that revealed the use of illicit drugs. The temporary restriction remains in place until the Board takes further action.

Deaton, Benjamin Andrew, M.D., Lic. No. M1623, Houston

On July 20, 2016, a disciplinary panel of the Texas Medical Board temporarily suspended, without notice, the Texas medical license of Benjamin Deaton, M.D., after determining his continuation in the practice of medicine poses a continuing threat to public welfare. The suspension was effective immediately. The Board panel found that Dr. Deaton was terminated by the Texas Physician Health Program (TXPHP) for his continual noncompliance with drug testing. Given his recent resumption of practicing medicine in Texas and history of substance abuse and noncompliance, Dr. Deaton poses a continuing threat to public welfare and a temporary suspension of his license is warranted. A temporary suspension hearing with notice will be held as soon as practicable with 10 days' notice to Dr. Deaton, unless the hearing is specifically waived by Dr. Deaton. The temporary suspension remains in place until the Board takes further action.

Pierre, James Darian, M.D., Lic. No. L8474, Houston

On August 24, 2016, a disciplinary panel of the Texas Medical Board temporarily suspended, with notice, the Texas medical license of James Darian Pierre, M.D., after determining his continuation in the practice of medicine poses a continuing threat to public welfare. The suspension was effective immediately. The Board panel found that based on the evidence presented, Dr. Pierre is operating an unlicensed pain management clinic and has failed to adequately supervise his midlevel practitioner who nontherapeutically prescribed controlled substances to multiple patients. The temporary suspension remains in place until the Board takes further action.

Way, Megan Kendra, M.D., Lic. No. M4644, Mesquite

On September 27, 2016, a disciplinary panel of the Texas Medical Board temporarily suspended, without notice, the Texas medical license of Megan Kendra Way, M.D., after determining her continuation in the practice of medicine poses a continuing threat to public welfare. The suspension was effective immediately. The Board panel found that Dr. Way admitted to Board staff her misuse of controlled substances, including during times that she was actively engaged in caring for patients. Dr. Way made her admission while she was being investigated for an alleged impairment incident during a surgical procedure for which she had her hospital privileges suspended. A temporary suspension hearing with notice will be held as soon as practicable with 10 days' notice to Dr. Way, unless the hearing is specifically waived by Dr. Way. The temporary suspension remains in place until the Board takes further action.

QUALITY OF CARE

Adeleye, Victoria M., M.D., Lic. No. N7985, Conroe
