Governor Appoints Two to Board

Governor Rick Perry has appointed Melinda McMichael, M.D., to the board. Dr. McMichael is an Austin physician. She graduated from Kansas State University and received her medical degree from the University of Kansas, where she was elected to Alpha Omega Alpha. After completing a residency in internal medicine at the University of Texas Health Science Center at San Antonio, she served a year as chief resident and clinical instructor in internal medicine. Since that time, she has practiced primary care and internal medicine at the University of Texas at Austin University Health Services, where for several years she was the medical director and has continued to contribute in various other clinical and administrative capacities. Dr. McMichael is board certified in internal medicine, and is a member of the American College of Physicians, Travis County Medical Society, Texas Medical Association, American Medical Association, and the American College Health Association. She previously served as a public member of the Board of Directors of the State Bar of Texas, and volunteers regularly at the Volunteer Healthcare Clinic in Austin. Dr. McMichael replaces John W. Pate, M.D., of El Paso, who had served on the board since 2002.

Governor Perry also appointed public member Timothy Webb, J.D., to the board. A native of Nashville, Tennessee, Mr. Webb received his law degree from the Thurgood Marshall School of Law at Texas Southern University in 1995. Prior to law school he enjoyed a successful career in pharmaceutical sales and served as a Captain in the United States Air Force. Mr. Webb worked for the law firm of Akin, Gump, Strauss, Hauer and Feld in Houston and subsequently formed the law offices of Webb & Associates. His practice primarily concentrates on bankruptcy and civil litigation. He is a member of the State Bar of Texas, College of the State Bar of Texas, American Inns of Court, and the Screen Actors Guild of America. He is admitted to practice in the United States District Court for the Northern, Southern, Eastern, and Western Districts of Texas and serves on the Cypress-Fairbanks Independent School District Legislative Study Committee. He served on the State Bar Mentor, Professionalism, and the Pattern Jury Charge Committees. He also served on the Development Ordinance Advisory Committee for the City of Carrollton, Texas, and was appointed to the Texas Physician Assistant Board in 2000 where he

served as Chairman from 2004 to 2007, until his appointment to the Medical Board. Mr. Webb replaced Mr. Eddie Miles Jr., who had served on the board since 1997.

Governor Perry also reappointed Roberta Kalafut, D.O., as President of the board, for a term ending April 13, 2013.

Keith Miller, M.D., of Center, who had served since 2003, has also left the board. The board appreciates the service Dr. Pate, Mr. Miles and Dr. Miller have given to the people of Texas.

Know the Law that Regulates Your Practice

The Texas Medical Board has two core functions: to license qualified physicians, physician assistants and acupuncturists who wish to practice in Texas; and to take disciplinary action against licensees found to be in violation of the Medical Practice Act (which is part of the Texas Occupations Code) or the appropriate practice act for PAs or acupuncturists.

The Texas Legislature sets the standard by which TMB carries out those functions. In the 2003 and 2005 sessions, the Legislature made changes that dramatically affected the process, enabling TMB to be more effective, efficient, fairer to licensees against whom complaints are filed, and better protecting the public.

Legislative changes made in 2003 through Senate Bill 104 as part of the tort reform package gave TMB new powers and resources to more effectively prosecute standard of care cases. When TMB underwent Sunset review during the 2005 Legislative session, rules adopted to implement SB 104 were codified into law as SB 419. Among the changes were statutory time limits to complete investigations and litigate cases, ending an era during which cases dragged on for years, to the dissatisfaction of all concerned. Most cases now reach resolution within a year.

To help understand how TMB reaches a disciplinary action, let's briefly review the process.

Complaints

When TMB receives a complaint (just under 7,000 in Fiscal Year 2007), board staff first determines if the complaint is against a licensee we regulate, i.e. a physician, physician assistant or acupuncturist. Complaints against other practitioners are forwarded to the appropriate regulatory agency.

Of those roughly 7,000 complaints received, about 4,400 are dismissed for one of the following three reasons: they are not against one of our licensees (nonjurisdictional); we determine that the complaint, if accurate, would not violate the MPA (jurisdictional-not filed); or the complaint may be dismissed during an initial 30-day period during which we contact both the complainant and the licensee—the former to make sure we have all of the necessary information; the latter to

provide an opportunity to refute the charges with documentary evidence. If the licensee provides sufficient evidence during this 30-day period that there was no violation, there is no investigation.

Statutory Authority

Sections 164.051 and 164.052 of the Occupations Code spell out the violations for which TMB may deny licensure or discipline a licensee. Here they are paraphrased; the full statutory language is at <http://tlo2.tlc.state.tx.us/statutes/oc.toc.htm>:

- ◆ Conviction or deferred adjudication, community supervision, or deferred disposition for a felony or a misdemeanor involving moral turpitude.
- ◆ Commits or attempts to commit a violation of the Board Rules (complete Board Rules are at <http://www.tmb.state.tx.us/rules/rules/bdrules.php>).
- ◆ Is unable to practice medicine with reasonable skill and safety because of illness, drunkenness; excessive use of drugs, narcotics, or other substances, or a mental or physical condition, or is found by a court to be of unsound mind, or uses alcohol or drugs in an intemperate manner that could endanger a patient's life.
- ◆ Fails to practice medicine in an acceptable professional manner consistent with public health and welfare.
- ◆ Is removed, suspended or subject to discipline by peers.
- ◆ Is subject to repeated or recurring meritorious health care liability claims.
- ◆◆ Is disciplined by another state board.
- ◆ Submits false or misleading documents in application for licensure.
- ◆ Commits unprofessional conduct likely to deceive or defraud the public.
- ◆ Uses an advertising statement that is false, misleading or deceptive, or advertises professional superiority in a manner not readily subject to verification. This includes claiming certification by an ABMS board when such is not the case, or claiming certification by a board not recognized by the TMB.
- ◆ Purchases, barter or uses a medical degree, license or diploma, or alters with fraudulent intent, a license, certificate, diploma or transcript, or uses such a document, or subverts the examination process for licensure.
- ◆ Impersonates a physician.

- ◆ Employs or associates in practice with a person whose license to practice has been suspended, canceled or revoked.
- ◆ Performs or procures a criminal abortion; performs an abortion on a viable unborn child during the third trimester of pregnancy (with certain exceptions); performs an abortion on an unemancipated minor without proper consent.
- ◆ Aids and abets the unlicensed practice of medicine.
- ◆ Violates any state or federal law connected to the practice of medicine (a complaint, indictment or conviction is not necessary; proof of commission of the act is sufficient).
- ◆ Fails to keep records of purchase and disposal of controlled substances.
- ◆ Writes false or fictitious prescriptions.
- ◆ Prescribes nontherapeutically.
- ◆ Fails to adequately supervise those to whom the physician delegates or delegates to someone known to be unqualified.

Investigations

The investigative process varies depending upon the allegations. In cases in which the allegations are not related to the standard of care, relevant information is collected by an investigator. Next, a quality assurance committee reviews the case for legal action if there appears to be a violation, or it's recommended for dismissal if not.

If, on the other hand, the allegations concern standard of care violations, the investigator sends the relevant medical records to expert panelists. These experts are all certified by an ABMS board, are not located in the same vicinity as the investigated doctor, and have been selected by a series of peers. The expert, certified typically in the same specialty in which the investigated doctor was trained, evaluates all the relevant medical information and submits a report to the investigator. Whether or not the expert determines there is a violation of the standard of care, the case goes to a second expert. If that expert agrees with the first that the case shows a violation, the case is referred by the investigator to the QA committee. If both agree there is no violation, the investigator refers it to a board committee for dismissal. If the first two experts do not agree, the records go to a third expert, and the determination of two out of three panelists prevails. Either the case is referred by QA evaluation for litigation or it is referred to the board committee to consider for dismissal, after which the agency terminates the complaint and the parties are notified.

Litigation

If QA directs the case to go to litigation, the case is assigned to a staff attorney. Next, a board panel made up of a public and a physician member hears the case at an informal hearing. Present

at the hearing is the physician being investigated, frequently with an attorney, and a staff attorney representing TMB. At the Informal Settlement Conference, the board panel hears from both sides, deliberates, and determines whether there has been a violation of the MPA. If so, it recommends a disciplinary order that is offered to the physician. If not, the panel recommends to the board that the case be dismissed.

If the physician does not want to accept the proposed disciplinary order, even after negotiation, the case is referred to the State Office of Administrative Hearings for a formal hearing with the elements of a civil court trial, with sworn witnesses, rules of evidence, depositions and a formal record by a court reporter. The administrative law judge who hears the case deliberates and eventually presents a Proposal for Decision to the board with a recommendation for disposition of the case. However, the final decision ultimately rests with the board, which may accept the ALJ's proposal, modify it, or take an entirely different action.

Minimal Violations

TMB has recently begun issuing administrative orders for minimal statutory violations. These are complaints based on violations that do not involve the standard of care and are for rules violations such as failing to release medical records in a timely fashion; failing to get or properly document required continuing medical education; failing to timely sign a death certificate; failing to post information in the office for filing a complaint with TMB; or advertising one is board certified when he or she is not, or the board cited is not one TMB recognizes. If the licensee agrees to sign an order without appearing for an informal settlement conference, the action is resolved with an administrative penalty. These actions, although still public, will not be listed in news releases and the newsletter by name (beginning with this issue), only by the numbers of such violations.

There has been recent criticism that taking action on these minor rules infractions is a waste of the board's time and unnecessarily singles out otherwise good physicians. If board members believe there is a violation of the MPA, the board is legally compelled to take action. If the respondent wishes to contest the case and refuses to sign an order, a Formal Complaint is filed with the State Office of Administrative Hearings for a contested case hearing. This Complaint will list the violations the Board reasonably believes it can prove in a court of law and is published on the agency web site. At the conclusion of the formal SOAH hearing, the judge presents a recommendation to the board to resolve the matter. However, as noted above, the final decision rests with the board. These final board actions are public and appear on the licensee's profile on the agency web site.

Board decisions reflect an effort to strike a balance between public protection and fairness to respondents. The board and agency staff constantly strive to maintain a process that is fair and efficient to licensees while assuring the citizens of Texas that they are entitled to proper and competent treatment from their healthcare professionals.

New Processes in Place to Expedite Issuance of New Licenses

Screening and Analysis of Applications ♦ a Two-Part Process

TMB has developed a process to screen applications prior to assignment to a licensure analyst. This screening process is only to determine if, based on the information provided in the application, all expected items were submitted. The content of the items is not reviewed for acceptability until the application is assigned to a licensure analyst. A licensure analyst may determine that additional items or additional information related to a licensure requirement, not requested during the screening process, must be submitted.

Applicants will be contacted by e-mail as soon as the application is screened. They will be informed which, if any, expected items are lacking from the application. **Please note, until all of the items requested during the screening process are received, applications will not be assigned to a licensure analyst for content analysis.** ♦

For a speedier overall licensure process, applicants should know what supplemental documentation is required and submit it at the same time as submitting the application online. Visit the TMB web site for a supplemental documentation checklist, eligibility requirements, and other important information

<http://www.tmb.state.tx.us/professionals/physicians/applicants/physicianapplicants.php>).

Priority Handling and Expedited Handling for Certain Applicants

Physician Applicants Treating Medicare and Medicaid Patients

Applicants who agree to treat Medicare and Medicaid patients for the five years following issuance of their medical licenses will be assigned a priority status for application processing. Applicants must sign an agreement that they will accept any Medicare and Medicaid patient. The agreement must be submitted to the board. ♦ It is on the web site, under Additional Licensure Forms and titled Form X. Visit the TMB web site for the form

<http://www.tmb.state.tx.us/professionals/physicians/applicants/licforms.php>).

Agreements by physicians will be noted on the Board ♦s web site and may also be reflected in the physicians ♦ Public Physician Profile on the web site. Failure to comply with this agreement shall constitute unprofessional or dishonorable conduct that is likely to deceive or defraud the public or injure the public and may result in disciplinary action.

Applicants Who Will Practice in Certain Areas

The board is required to expedite handling of applicants who will practice in Medically Underserved Areas (MUAs), Health Professional Shortage Areas (HPSAs), and rural areas. Applicants must submit additional licensure Form X, and verification from the Department of State Health Services and/or the Office of Rural and Community Affairs. Visit the TMB web site for the form <http://www.tmb.state.tx.us/professionals/physicians/applicants/licforms.php>).

Priority Status and Expedited Handling

Priority status and expedited handling mean that an applicant's file will be placed ahead of applicants without priority status for screening, assignment to a licensure analyst after successful completion of screening, and for processing by a licensure analyst.

The order of priority of applications assigned priority status or expedited handling depends on the agreement and/or factors involved. Applicants who will treat Medicare and Medicaid patients in addition to practicing in an MUA, HPSA, and/or rural area will receive the highest priority.

Exam Attempts and Eligibility

Legislation passed last session modified the licensing examination attempt limits. An applicant for an unrestricted physician license must pass each part of an examination within three attempts; however, certain exceptions were added (Texas Occ. Code §155.056. Examination Attempt Limits)

Exceptions are **only** allowed for two groups of applicants, those who:

◆ held, or had a pending application for, a Physician in Training permit on 9/1/05, **or**

◆ have been licensed in good standing in another state for at least five years, and who have no restrictions, orders, or probation on any other state medical licenses

The exceptions are:

1. a fourth attempt allowed on one part only, or
2. a fifth or sixth attempt allowed on one part only, **if:**

◆◆◆◆◆ the applicant becomes specialty board certified by an A.B.M.S. or A.O.A. member board, **and**

◆◆◆◆◆ completes, in Texas, an additional two years of postgraduate medical training beyond what is required

Fingerprinting

As of October 1, 2007, physician licensure applicants, and many current applicants, are required to submit their fingerprints for state and national criminal history background checks. Fingerprinting services are provided by Integrated Biometric Technology for a fee of \$44.20, payable directly to IBT. Results of the fingerprinting will be sent directly to TMB both from the Texas Department of Public Safety Criminal Records and the Federal Bureau of Investigation. Applicants in Texas will make an appointment for a live scan (a process that captures fingerprints without the use of ink), at locations throughout the state of Texas. Applicants outside◆ Texas will be fingerprinted in ink on a card, (only cards provided by the Texas

Medical Board are acceptable), at a local law enforcement agency, and will submit the card directly to IBT for digital scanning. Visit the TMB web site for more information (<http://www.tmb.state.tx.us/professionals/physicians/applicants/fingerprinting.php>).

Licensure Application Fee

The application fee for physician licensure increased by \$80 on September 16. The new fee is \$885. The board is required to generate revenue to cover additional costs, including the addition of six new licensure staff. The additional licensure staff will assist in reducing the backlog of applications and in decreasing the amount of time it takes to process an application. Most fees have increased in recent years, but the physician licensure application fee has not increased since at least 1994, other than a \$5 increase for online applications.

Governor Appoints Physician Assistant Board Members

Governor Rick Perry has appointed four people to the Texas Physician Assistant Board.

New Physician Licenses Issued in Fiscal Year 2007

The Texas Medical Board issued licenses to 3,324 physicians during Fiscal Year 2007, which ended August 31. Future issues will include lists of new licensees since the previous issue. The board congratulates the following new Texas licensed physicians:
